MSc in
BUSINESS TRANSFORMATION FOR SUSTAINABILITY

KEDGE BUSINESS SCHOOL

EFMD EQUIS ACCREDITED · AACSB ACCREDITED · ASSOCIATION AMBA ACCREDITED

MSc MASTER OF SCIENCE

Make your future sustainable

"The MSc Business Transformation for Sustainability is built on an innovative experiential approach that provides the knowledge, skills and attitude to manage transformational challenges within organisations. Supported by solid pedagogical contributions provided by KEDGE Sustainability Centre of Excellence, it seeks to foster new value-creation possibilities, and to provide the keys to drive transformation for sustainability."

Fiammetta CASCIOLI, head of Business Transformation for Sustainability programme

Eduniversal 2023 French ranking
Innovation Award

DURATION: 1 OR 2 YEARS | **FORMAT:** FULL-TIME | **LANGUAGE:** ENGLISH

CAMPUS: PARIS | **INTAKE:** SEPTEMBER | **DOUBLE DEGREE:** MSc and diploma recognised by the Ministry of Higher Education and Research

HIGHLIGHTS

ANCHORING IN THE SUSTAINABILITY RESEARCH CENTRE

KEDGE's Research Centre for Sustainability conducts interdisciplinary research on the socio-economic and environmental impact of organisations at different levels of analysis. With 24 academics and 6 PhD students, it is one of the largest European research and higher education centre dedicated to corporate sustainability. The Research Centre is a catalyst for sustainable business practices and works towards a better and more sustainable world. The MSc builds on its expertise and know-how and passes it on to its students. Such anchoring allows students to participate in international seminars, conferences, and workshops on sustainable development challenges.

AN EXPERIENTIAL APPROACH

All along the MSc, students are immersed in an ecosystem and exposed to multiple testimonials, company visits, climate murals and experiential workshops. Real company challenges create the opportunity for students to apply sustainability notions and go through a first-hand sustainability transformation experience.Transformation is also encountered during the sustainability factories, in which students engage in a personal and organisational journey. By enhancing complex thinking capabilities for problem solving, sustainability factories allow for better problem framing, application of knowledge, acceleration of ideas, co-construction of solutions and presentation of sustainable value propositions for a better world.

AN NGO MISSION

Collaboration with key players from the civil world such as NGOs and regulators is key to successful business transformation. To ensure a thorough understanding of the potential of such cross-sector collaboration, students engage in an NGO mission with a specific assignment. The real-life experience in non-business sector organisations activates students understanding of the contributions that such players can make towards sustainability transformation. Skills acquired during the NGO mission are a differentiating element for employability. During the programme, students are supported in the transferability process of such skills in their career building process.

ABOUT KEDGE BUSINESS SCHOOL

LET'S BE THE CHANGE

15,000 students — **80,000** graduates

7th best French Business School **Financial Times 2022**

2nd French School for Research in Business Administration **Shanghai Ranking 2022**
