HIGHLIGHTS

INTERNATIONAL DIMENSION

This programme is taught entirely in English from the first year onwards, enabling students to acquire an advanced command of English for the international business world. It provides access to:

- a world-class business school with campuses and partners on all 5 continents
- a faculty & professors whose diversity mirrors that of the student body
- the international peer community of a Research Centre conducting market-specific research
- a large and growing alumni network worldwide.

REAL-WORLD STUDY PROJECTS

The key priority of this programme is to build close links with the corporate world through a business-oriented method that stimulates and supports students in raising their levels of professionalism and developing new perspectives. They are exposed to current real-life situations, presentations by professionals from different sectors, conferences and group projects - including the development of a global business plan. Combined with an introduction to French heritage and an internship, this hands-on teaching significantly enhances students' employability after graduation.

MULTIDISCIPLINARY APPROACH

Students explore distinct subjects in a variety of fields, allowing to build extensive background knowledge for developing international business. Areas of general and disciplinary expertise include: business systems and processes at both strategic and operational levels; management skills applied in international contexts; a global vision of business functions, as well as major recent trends in the sector. As part of the second year, they have a choice among 2 electives per campus to tailor their degree based on their own objectives. These resources lead to endless career opportunities within the field.
